

# SOC 1 Type II Report

GlobalTalent HR Solutions LLC  
Description of the SaaS - HR / Payroll / Benefits

For the period 2024-10-01 through 2025-09-30

Prepared by:  
**BPM LLP**

Independent Service Auditor's Report

CONFIDENTIAL - FOR INTENDED RECIPIENT USE ONLY

This report is restricted to the management of the service organisation, user entities of the service organisation, and prospective user entities, their auditors, and other parties who have sufficient knowledge to consider it together with other information.

## Section I - Management's Assertion

We have prepared the accompanying description of GlobalTalent HR Solutions LLC's SaaS - HR / Payroll / Benefits system ("the description") throughout the period 2024-10-01 to 2025-09-30, in accordance with the criteria for a description of a service organisation's system in DC section 200, *Description Criteria for a Description of a Service Organisation's System in a SOC 2 Report* (the description criteria).

We confirm, to the best of our knowledge and belief, that:

- The description fairly presents the system that was designed and implemented throughout the period.
- The controls stated in the description were suitably designed throughout the specified period to provide reasonable assurance that the service organisation's service commitments and system requirements would be achieved based on the applicable trust services criteria.
- The controls operated effectively throughout the period 2024-10-01 to 2025-09-30 to provide reasonable assurance that the service commitments and system requirements were achieved.

Signed:

**Brendan Murray, Founder and CTO**

GlobalTalent HR Solutions LLC

Dated: 2025-09-30

## Section II - Independent Service Auditor's Report

To the management of GlobalTalent HR Solutions LLC:

### Scope

We have examined GlobalTalent HR Solutions LLC's description of its SaaS - HR / Payroll / Benefits system throughout the period 2024-10-01 to 2025-09-30 (the description) and the suitability of the design and operating effectiveness of controls stated in the description to achieve the related service commitments and system requirements based on the trust services criteria relevant to financial reporting controls only (applicable trust services criteria) set forth in TSP section 100, *2017 Trust Services Criteria for Security, Availability, Processing Integrity, Confidentiality, and Privacy*.

### Service Auditor's Responsibilities

Our responsibility is to express an opinion on the description and on the suitability of the design and operating effectiveness of controls stated in the description based on our examination. We conducted our examination in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform our examination to obtain reasonable assurance about whether, in all material respects, the description is fairly presented and the controls were suitably designed and operating effectively to achieve the service organisation's service commitments and system requirements.

### Inherent Limitations

Because of their nature, controls at a service organisation may not prevent, or detect and correct, all misstatements relating to the achievement of service commitments and system requirements. Also, the projection to the future of any conclusions about the suitability of the design or operating effectiveness of controls is subject to the risk that controls may become inadequate because of changes in conditions.

### Opinion

**Basis for Qualified Opinion.** As described in Section IV, the controls did not operate effectively throughout the period in respect of: (i) communication of security events to external users (CC2.3); (ii) data retention (P4.2); and (iii) internal monitoring activities (CC4.1). The matters identified in Section IV represent material weaknesses in the operating effectiveness of controls.

In our opinion, except for the matters described in the Basis for Qualified Opinion paragraph and in the 'Description of Tests of Controls and Results' in Section IV, the controls stated in the description were suitably designed and operated effectively throughout the period.

## Section III - Description of the System

### 3.1 Overview of Operations

GlobalTalent is a SaaS HR information system used by Aurora Investment Bank's US subsidiary for employee onboarding/offboarding workflows, time tracking, performance review storage, benefits enrollment, and US payroll processing for ~1,800 employees and contractors. Bank HR and finance teams interact with the system via a web portal.

Service Organisation Information:

|                  |                                         |
|------------------|-----------------------------------------|
| Legal name       | GlobalTalent HR Solutions LLC           |
| Headquarters     | Austin, TX, USA                         |
| Incorporation    | Texas LLC #0805411222                   |
| Founded          | 2009                                    |
| Headcount        | ~140 FTEs                               |
| Service category | SaaS - HR / Payroll / Benefits          |
| Geography        | us-central-1 only (Iowa). No DR region. |

### 3.2 Components of the System

#### Infrastructure

The infrastructure supporting the in-scope services consists of physical, virtual and cloud-based components organised across redundant data centres or hyperscale regions, with logical separation by environment (production, pre-production, development) and by tenant.

#### Software

The software stack includes the proprietary application platform, supporting services (databases, message queues, caches, observability), and third-party libraries managed via a controlled software supply chain.

#### People

Operations are delivered by ~140 FTEs across Engineering, Site Reliability, Security, Compliance, Customer Success, and corporate functions. All personnel are subject to background screening and confidentiality obligations.

#### Procedures

Standard operating procedures govern change management, incident management, access management, capacity management, vulnerability management, vendor management and business continuity. Procedures are reviewed at least annually.

#### Data

Data processed by the system includes: Employee PII (name, DOB, address, national ID / SSN, bank account, salary); Performance review documents and HR case files; Time and attendance records; Benefits enrollment selections (incl. medical/dental dependent info); Payroll output files (NACHA / ACH)

### 3.3 Subservice Organisations

GlobalTalent HR Solutions LLC relies on the following subservice organisations. The description is presented using the carve-out method; the controls of subservice organisations are not included in the scope of this report. Complementary subservice organisation controls (CSOC) expected to be in place at each subservice organisation are identified below.

| Subservice Organisation  | Service Provided                        | Location      |
|--------------------------|-----------------------------------------|---------------|
| Amazon Web Services Inc. | IaaS hosting                            | United States |
| Stripe Inc.              | Payment processing for benefits add-ons | United States |

### 3.4 Significant Changes During the Period

Adopted Okta SAML SSO in Jan 2025. No other material changes to the system.

## Section IV - Description of Controls and Tests of Controls

The following control activities, as designed and implemented by the service organisation, were tested by the service auditor during the period. The table summarises a representative subset; the complete control matrix is available upon request under NDA.

| Ref      | Domain                                      | Control                                                                           | Test Procedure                                                                      | Result                            |
|----------|---------------------------------------------|-----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|-----------------------------------|
| CC.GT.01 | Logical Access - User Provisioning          | Provisioning access is approved by the user's manager and the Global Talent team. | Inspected user provisioning tickets and the Global Talent team's provisioning logs. | No exceptions noted.              |
| CC.GT.02 | Logical Access - Privileged Account Reviews | Quarterly review of privileged accounts and their production environment.         | Inspected the production environment for quarterly privileged account reviews.      | Exception noted for 1 account.    |
| CC.GT.03 | Change Management - Production Approvals    | Production deployments require secondary approval from the Global Talent team.    | Inspected change tickets for 25 sampled deployments.                                | Exception noted for 1 deployment. |
| CC.GT.04 | Logical Access - Termination                | Access removal within 1 business day of termination.                              | Inspected HR termination logs against IAM logs for 30 sampled terminations.         | No exceptions noted.              |
| CC.GT.05 | Backups - Restore Testing                   | Production backups are restored and tested quarterly.                             | Inspected the test results for 10 sampled backups.                                  | Exception noted for 1 backup.     |
| CC.GT.06 | Network - Firewall Reviews                  | Firewall rule reviews performed quarterly.                                        | Inspected the review documentation.                                                 | No exceptions noted.              |

### 4.1 Description of Exceptions Noted

#### 4.1.A - Logical Access - Privileged Account Reviews

**Description:** For 6 of 12 sampled quarters, evidence of quarterly privileged account review for the production database environment could not be located.

**Management response:** Management acknowledges the gap. A revised quarterly review procedure was rolled out in November 2025.

#### 4.1.B - Change Management - Production Approvals

**Description:** For 14 of 35 sampled production deployments, the documented change ticket did not include evidence of secondary approval prior to deployment.

**Management response:** GlobalTalent is implementing required pull-request approvals via GitHub branch protections in early 2026.

#### 4.1.C - Backups - Restore Testing

**Description:** No evidence of restore testing was provided for the production payroll database during the audit period.

**Management response:** Restore testing planned for Q1 2026 but not yet executed at issue date.

## Section V - Other Information Provided by Management

The following information is provided by management for the convenience of report users and has not been subjected to procedures applied in the examination.

### **Roadmap and Continuous Improvement**

Q1 2026: Pursue SOC 2 Type II readiness assessment. Q2 2026: Mandatory MFA enforcement for admin accounts. Q3 2026: Cross-region backup capability.

### **Customer Complementary User Entity Controls (CUECs)**

- User entities are responsible for managing logical access for their own users to the service.
- User entities are responsible for ensuring data uploaded to the service is appropriate for processing under the agreement.
- User entities are responsible for monitoring service usage for anomalies.
- User entities are responsible for keeping API tokens and SSO certificates current.

*End of report.*
